

Equipment List

PrePress Department

- iMac workstations
- Fuji XMF workflow
- Epson proofers
- Epson scanner
- Javelin platesetter
- Full Prepress Software Library (Mac)
- Extensive font library
- E-mail and FTP media supported

PrePress Capabilities

Greenhaven utilizes Macintosh software platform. For additional charges, we are also able to convert files from Microsoft Word and Excel.

We offer direct-to-plate output, scanning, layout creative services, proofing formats include all electronic formats, B&W laser, high resolution full color Epson, and low resolution Epson for backups and bindery mockups.

Transfer of electronic files up to 10 MB (stuffed or zipped) can be e-mailed to your CSR. Larger files can be uploaded to Greenhaven's FTP server. Please contact your CSR for FTP login information.

Full Data-Processing Services

Greenhaven can manage all aspects of your data processing needs. Here are just some of the services we provide to our client everyday: File conversion, data validation & standardization, CASS/NCOA services, full-service postal sortation, match & consolidate, suppression.

Mail Handling Capabilities

Greenhaven combines sophisticated direct mail strategy with comprehensive list and print production capabilities. Traditionally you'll find that most direct mailers are forced to utilize separate suppliers for creative, list acquisition, data processing, print, envelopes, and lettershop or bindery services. At Greenhaven we have the ability to consolidate your supply chain to a single point of contact.
